

# NPs and PAs in Interventional Radiology

*Inaugural edition: Spring 2022*

Greetings fellow interventional radiology advanced practice providers!

On behalf of the SIR NP/PA Section Governing Council, it is my sincere pleasure to share with you all the exciting resources coming in 2022. Our primary mission is to provide resources for IR NPs and PAs, who are often team leaders in the clinical decision-making process, and to provide a forum in which advanced practice providers can work together to exchange information, education and resources to excel.

In this spirit, we are hard at work preparing for the SIR 2022 Annual Scientific Meeting in Boston, developing great content, networking opportunities and hands-on workshops. While the annual meeting is a great way to connect and share resources, we are also developing ways to do this year-round. We are currently working on a quarterly newsletter, increasing our social media presence and creating resources for new APPs in the field, such as webinars, CME opportunities and other networking events.

It is our hope that we can unify advanced practice providers working in interventional radiology and provide a supportive environment for learning, increase steady enrollment and involvement of NPs and PAs in SIR, distribute the most up to date research on best practice measures, develop and present educational programs accredited by accepted credentialing bodies, and provide a forum that supports NPs and PAs in IR. We hope this encourages a robust exchange of information and will increase expertise in patient and procedural care.

We would love to hear from you and learn how to continue to grow our membership. Let us know what we can do to better support you in the field of interventional radiology.

Warmest regards and best wishes for what 2022 will bring for all of you.

Carrie Marie Hayes, MS, PA-C
