

Course Description

For interventional radiologists interested or experienced in cerebral angiography, carotid revascularization, and/or endovascular stroke thrombectomy, the 2021 SIR Stroke Symposium provides participants with the latest in stroke education. Topics include updates on stroke trials, emerging areas including low ASPECTS, low NIHSS, and medium vessel occlusion stroke, and challenging stroke interventions in refractory and tandem occlusion cases.

Learning Objectives

Upon completion of this course, an attendee should be able to:

- Describe recent developments and summarize the findings of clinical trials of thrombectomy for AIS
- Describe clinical trials and techniques for low ASPECTS, low NIHSS, and medium vessel occlusion AIS
- Describe data and technical challenges for stroke interventions in refractory and tandem occlusion AIS
 - Describe patient selection, techniques, and complications of thrombectomy for AIS
