
In Section 18, “Recommendations for Management of Patients With Cervical Artery Dissection,” the Class IIa Recommendation #1 (p. 1012), which begins “For patients with symptomatic cervical artery dissection, anticoagulation with. . .,” should be changed to read:

1. Antithrombotic treatment with either an anticoagulant (heparin, low molecular weight heparin, or warfarin*) or a platelet inhibitor (aspirin, clopidogrel, or the combination of extended-release dipyridamole plus aspirin*) for at least 3 to 6 months is reasonable for patients with extracranial carotid or vertebral arterial dissection associated with ischemic stroke or TIA (72a–72d). (Level of Evidence: B)

*Drugs are not listed in order of preference.

The following references should be added to the reference list:

doi:10.1016/j.jacc.2011.05.005

In this paper, on page 1563, left column, line 2, the PINNACLE Registry name was incorrectly expanded. This incorrect expansion also appears in the Table of Contents (page A4) and the Inside This Issue (page A28) of the April 5, 2011, issue. The correct expansion is: “PINNACLE (Practice INNovation And CLinical Excellence).”

We apologize for this error.
